## Announces

### 3D Mineralized Shell Model for Lingman Lake

FOR IMMEDIATE RELEASE

NOT FOR DISTRIBUTION TO THE U.S.A. NEWS WIRE SERVICES OR FOR DISSEMINATION TO THE U.S.A.

December 16, 2015 – Vancouver, British Columbia

---

Signature Resources Ltd. (SGU: TSX-V) (the "**Company**") announces the posting of a 3D mineral shell model for its Lingman Lake gold property. The model was created by independent consulting firm Caracle Creek International Inc. and is based on archived historical data that has been collated into a digital data base.

The model highlights the stacked, "pancake" geometry of the gold mineralized zones identified as: North Zone, Central Zone, South Zone and 11640 Zone. The North, Central and South Zones are further subdivided into subparallel subzones as North Zone A&B, Central Zone A&B, and South Zone A&B. A significant component of this model is an intrusive complex of feldspar-quartz porphyry interpreted to be genetically associated with gold distribution of the deposit, acting as the thermal and chemical catalyst for gold concentration in veins and larger silicification zones within the porphyry and enclosing volcanic rocks.

Rotation of the model illustrates the open ended extent of the gold mineralized zones along strike and down dip. Features that will provide target delineation for resource expansion.

"We are pleased that the model is demonstrating the integrity and validity of the historic data base which bodes exceptionally well for using this data base in establishing a compliant inferred resource," commented Mr. Walter Hanych, President and CEO of the Company.

The model is available for viewing on the company website at: [www.signatureresources.ca](http://www.signatureresources.ca) on the 'Project' page. Follow the instructions to download the 3D model for viewing with Acrobat Reader.

#### About the Company

Signature Resources Ltd. is an exploration company, publicly traded on the TSX Venture Exchange (TSX-V) under the symbol SGU, focused on the exploration and development of its Lingman Lake Property, located in Northwestern Ontario. The property is at a preliminary stage and hosts a historic gold estimate which is to be evaluated to potentially bring the historic estimate to current compliant resource reporting.
